Personal statement:

Highly skilled indie **game designer**, working across **game and level design, visual art and interactive installations**. Focused on turning small ideas into playable prototypes and exploring the process of refining them through playtests and UX feedback. Current interests centre on nature-themed experiences, children's education, interpersonal communication and AI-augmented visual storytelling, developed through a series of small but polished indie projects.

Education: BA (Hons) in Digital Media Arts (Collaborative Program)

- Xiamen University, China(2022 – 2026)
 - University for the Creative Arts (UCA), UK (2022 – 2026)
- GPA: 3.32 / 4.0 (Top 15% in Department)

Key course:

Professional Software Application	(95/100)	– Software related to media technology, integrated workflow.
Design & Media Theory Research	(94/100)	– Image narrative, interactive art, game-related media theory.
Business & Entrepreneurship Skills	(95/100)	– Project management, business models, IP operation basics.

Skills & Tools:

Game & Design – Game full-process design, UX / UI flow, concept art, AIGC visual workflow.

Engines – Unity , Unreal.

2D & Video – Photoshop, Illustrator, Procreate, Premiere, After Effects, Audition, InDesign.

3D & Virtual Production – ZBrush, Blender, Substance Painter, MotionBuilder.

Creative Coding & Hardware – TouchDesigner, Max/MSP, Processing, Arduino, Raspberry Pi.

AIGC Tools – Midjourney, Runway, Keling AI, ChatGPT, Gemini.

Game projects:

Little Toad, Huge Discovery , independent production, 2025.

A **open World Role-playing Game** in which players take on the role of a brave toad to integrate into the ecosystem without being suspected and isolated by other toads. The game implements basic NPC behaviors, collectible items, and NPC interactions, and has successfully undergone multiple rounds of testing with core players.

Tools: Unity, Photoshop, Blender, 3Dscanner, Procreate, Audition.

Say and Guess, collaborative production in 2 members, 2024.

A **local Co-op Party Game** that explores the impact of noise in interpersonal communication. Two or more players need to achieve information transmission in a noisy environment under the condition of information asymmetry, by combining gestures. The game created a 5 to 10 minute compact competition with a tight rhythm and high replay value.

Roles: System, Planning, Art Design.

Tools: Unity, Figma, Photoshop.

Escape to the Outdoors, independent production, 2024.
A portable interactive device/game explores the prototype of virtual reality and real-world game interaction as a possible solution for teenagers' natural deficiency disorder. Users can record their exploration of nature by carrying a portable tool, thereby advancing the progress in the virtual game and enhancing their desire to explore nature. This interactive prototype uses Arduino to capture data from the natural environment, enabling the data to drive corresponding changes in Unity.

Tools: Arduino, Unity.

Other creative project:

AIGC Chinese Poetry Visualisation, 2023 – 2025.

University Innovation Training Programme Project **Leader**

The project established a reusable process for poetry analysis - visual element extraction - AIGC generation - post-editing. A literature review and reference management were conducted on the application of AIGC in visual narrative and concept design; solid skills were acquired in presentations and academic defense.

Role: Overall planning, proposal writing, final report compilation, and team coordination.

"Human · AI · Special Needs" AIGC Multi-modal Platform, 2023 – 2025.

National Innovation Training Programme Team **Member**

This project investigated various "special needs" user groups and transformed the obtained results into an AI-based job search service website tailored to the needs of special populations.

Role: literature review, competitor analysis, data visualization, and user interface design.

Awards:

University Scholarship, 2023–2024.

"Three-Good Student" (excellent in morality, study, and discipline), 2023–2024.

First Prize, "Xingzheng-Nanqiang" Rural Revitalization Product Design Competition, 2023.

Finalist, Cross-Strait Chinese Character Culture Creative Design Competition, 2024.

Excellence Award, 20th Shunxin Cup "Zhongnan New Talent" Art & Design Competition, 2024.

Interests:

Have accumulated over 3,000 hours of gaming experience, a long-term player of multiplayer online battle and competitive games, with a strong interest in game rhythm control and balance. Prefer narrative-driven, cooperative mode, and role-playing games. Often analyze their levels and system designs. Full of enthusiasm for the gaming industry, fond of painting and derivative design, capable of shooting, editing, and skeletal binding animation.

Selected Playtime:

•FPS:

Apex Legends: 2,200 h; PUBG Mobile: 30 h; VALORANT: 20 h; Overwatch: 10 h.

•MOBA:

League of Legends/Honor of Kings: 1,400 h; Onmyoji Arena: 20 h.

•Party / Casual Games:

Stardew Valley: 30 h; Overcooked: 20 h; Fall Guys: 6 h.

•Strategy / Tactical Games:

Teamfight Tactics: 200 h;

Arknights: 30 h; Onmyoji: 20 h;

Reverse: 1999: 10 h.
